PRODUCT BROCHURE

The SUMNER Adjust-A-Flange™ is an innovative alignment accessory designed to be used with the Adjust-A-Fit™ tool, providing a complete, gravity-assisted solution for accurate pipe flange positioning. This one-man system simplifies the task of bringing flanges to precise plumb for tack welding and final weld-out, improving alignment speed and accuracy.

Engineered to fit all flanges for 5" / 127 mm pipe and larger, the Adjust-A-Flange™ accommodates bolt holes from  $\frac{3}{4}$ " -  $1\frac{5}{8}$ " / 19 - 42 mm, offering broad compatibility across a range of pipe sizes. It securely handles loads of up to 1,000 lbs / 454 kg, ensuring dependable performance under jobsite conditions.

Integrated flange nuts act as convenient reference points, enabling quick level checks during setup. Built for reliability and ease of use, the SUMNER Adjust-A-Flange™ is the go-to tool for pipe fitters seeking precise, safe, and efficient alignment for flanged connections in industrial and construction environments.
